Professional Summary

Computer Engineering student who enjoys building software, solving problems, and exploring new technologies. Hands-on experience in developing applications using Python, Java, web technologies, and databases. Interested in using AI-assisted coding tools to write better code, debug issues, and learn more efficiently. A quick learner who enjoys working with others, taking on new challenges, and turning ideas into practical solutions.

Education

Vidyalankar Institute of Technology, Mumbai 2023 – 2027
B.Tech in Computer Engineering *CGPA: 9.70/10*

Gracious College of Science and Commerce 2023
Higher Secondary Certificate (HSC) *84.83%*

Pious Buds English High School 2021
Secondary School Certificate (SSC) *92.20%*

Experience

Cloud Counselage Pvt. Ltd. May 2026 – Jul 2026
Machine Learning Intern

- Developed a Student Career Path Predictor using Python and Streamlit to process student attributes and generate career-related predictions and recommendations.
- Used Pandas and NumPy for data preprocessing and supported the development of a structured prediction workflow and interactive application.
- Tested application inputs, checked edge cases, investigated prediction inconsistencies, and debugged Python dependency and version compatibility issues.
- Worked with GitHub for version control and deployed the application using Streamlit Cloud.

Projects

BhashaRAG – Multilingual Document Intelligence | *Python, Streamlit, ChromaDB*

- Built a document question-answering application that processes PDF, DOCX, and TXT files and supports responses in English, Hindi, Marathi, Sanskrit, and Haryanvi.
- Implemented document chunking, multilingual sentence-transformer embeddings, and ChromaDB-based retrieval to find relevant passages for user questions.
- Added selectable response styles, optional source passages and similarity scores, voice input, and text-to-speech support.

AI Vision – Image Analysis Web Application | *Python, Flask, Azure AI Vision, REST APIs*

- Developed a Flask web application that analyzes uploaded images using Azure AI Vision and returns image descriptions, tags, and object detection results.
- Integrated REST API requests and created a web interface using HTML, CSS, and Jinja2 templates.
- Deployed the application to Azure App Service and configured GitHub Actions for automated deployment.

MediConnect – Healthcare Management Application | *React, JavaScript, Flask, SQL, Supabase*

- Developed a healthcare application concept supporting patient registration, appointment scheduling, practitioner management, and medical record handling.
- Worked on responsive user interfaces and backend integration using React, JavaScript, and Flask.
- Used Supabase and SQL-based data management and tested registration, authentication, and appointment workflows for functional correctness.

Technical Skills

Programming Languages: Java, Python, SQL

Web Development: HTML5, CSS, JavaScript, React, Flask, Streamlit, REST APIs

Databases: MySQL, PostgreSQL, and Supabase

Cloud and Development Tools: Microsoft Azure, Google Cloud Platform (GCP), GitHub, GitHub Actions, Docker, Postman, VS Code

Certifications

CDAC - Cloud Computing Course, 2025

CompTIA IT Fundamentals: Database Concepts – Infosys Springboard, 2024

Leadership and Volunteering

Technical Council Member, VIT: Contributed to student technical activities and collaborative initiatives.

Teaching Associate, Vision Rescue – Beacon Learning Centre: Supported educational activities and learning initiatives.

ConnectFor Volunteer: Participated in environmental drives, school painting, and meal-packaging activities.
